

We're taking public action to win the contract we need for our patients and our families

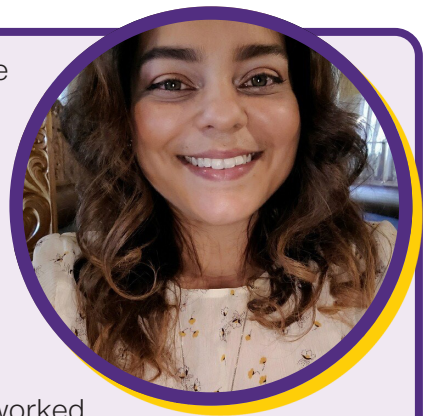

A majority of us unanimously voted YES to take public action to win our next contract. We cannot accept the many takeaways management has put on the table and that's why we're bringing our fight for a fair contract to the community. We're enlisting the help of our friends, neighbors, union brothers and sisters, and patients to call on EVH Monroe management to settle a contract that moves us forward, not backward. Management has spent millions of dollars on travelers - it's time they invest in their own employees!

"I couldn't begin to express how proud I am of all the EHM employees who took the time to come and vote. It is these same employees that allowed us to secure a unanimous YES vote!

These several months of negotiations have been, to say the least, a bit defeating for all of us. We have had no movement for basic rights as employees and extreme takeaways on the table by management. However, with this move we are hoping that management now sees, if they didn't before, we are ready and willing to secure a contract that reflects wage increases that keep up with the rising cost of living, and values us as employees by any means necessary.

We have given a fair opportunity to bargain in good faith but continue to feel overworked and taken advantage of because of our loyalty to this community. We all have made sacrifices, and now it's time to take action - talk to your bargaining team members to get the plan for public action next steps!"

- Roshana Revenig, EVS

Our community has our backs!
